Re: Ex Parte Notice in ET Docket No. 10-28

Dear Ms. Dortch:

Pursuant to § 1.1206(b) of the Commission's Rules, this letter serves to notify the Commission that on Wednesday, November 9, 2011, Arik Fux of Xsight Systems Ltd. ("Xsight") and the undersigned counsel to Xsight met with Mark Settle of the Office of Engineering and Technology.

At the meeting, we reiterated our position as set forth in Xsight's Reply Comments filed on August 1, 2011 supporting the views of various members of the automotive industry that the FCC should amend the Part 15 rules to accommodate their requests and urging the FCC to make the necessary changes to allow Era Systems ("Era") and other providers of airport safety systems to deploy fixed location radars in the 76-77 GHz band in airports, including installations near runways and taxiways. We noted that allowing providers of airport safety systems to deploy fixed location radars in the 76-77 GHz band in airports would not present any interference issues and that no commenter in the present proceeding has objected to Xsight's or Era's requests to permit such fixed installations.

Very truly yours,

/s/ Brian D. Weimer
